Dear Mitra, Harvey & Crew,

It is with great pleasure that I find myself writing this letter. Green Planet Building was an outstanding company to work with on a daily basis on this particular construction project. You went “above and beyond” in support and understanding the delicate nature of this construction project and the clients need for urgency, cleanliness, and anonymity.

As an estate manager there was a hesitation that communication would get lost by the parties involved on this project, however the dedicated project site that you setup online, made my client, and myself feel at ease. We were delighted to see every aspect of our project online from schedules, to communication, to contracts.

You guys have an extraordinary crew to work with on a daily bases and all worked tirelessly to achieve the goals and timeline of the client. What made it easy for me personally was the fact that you and Harvey always came up with solutions along the course of construction, especially the practical eco-friendly options, which the client loved. As you have experienced, there are hiccups with any construction project and the personal communication, the positive attitude, and ease, made the whole project seamless and enjoyable.

I’ve received many compliments from management, staff, and owners on the property; the level of detail in the kitchen is exquisite.

I would be happy to recommend the Green Planet Building team to anyone. Thank you for making my life easier the last year and a half.

Sincerely,

Martiy
